

# HOW SOLID GROUND CREATES POSITIVE CHANGE

Solid Ground works to end poverty and eliminate racism in the Greater Seattle region by serving people living on low incomes and communities of color.

We do this by...

**Meeting immediate needs**  
by providing emergency  
resources and support

**Preventing homelessness**  
through short- and long-term  
housing solutions

**Increasing  
stability for people  
in poverty.**

**Building long-term success**  
through trauma- informed  
case management and life  
skills training

**Increasing stability**  
by linking people to  
resources they need in  
the community

&

**Building commitment  
in the community**  
to make ending poverty  
and racism a priority

**Influencing how others  
deliver services**  
through collaborations  
and coalition building

**Undoing systems of  
oppression to create  
opportunity for all.**

**Listening to people**  
we serve to shape service  
delivery and policy priorities

**Mobilizing people**  
to advocate for  
themselves

As a direct result, people increase their well-being and stability, and our community is more equitable for future generations.
